UNESCO BULLETIN FOR LIBRARIES

VOL. VI, No. 10
OCTOBER 1952

TABLE OF REFERENCES ACCORDING TO THE U.D.C.

INDEX DES NOTICES CLASSÉES SELON LA C.D.U.

Readers will find under the following subject-headings (marked with their appropriate U.D.C. figure-symbols) the relevant number for each item.

On trouvera ci-dessous un numéro d'ordre pour chaque article classé sous les grandes rubriques de la C.D.U.

0. *General reference works; librarianship / Ouvrages généraux de référence; bibliothéconomie:* 472, 475, 477, 478, 481-502, 514, 547, 548, 556.
1. *Philosophy; ethics / Philosophie; morale:* 509, 529, 536, 547, 548.
2. *Religion; theology / Religion; théologie:* 536, 548.
3. *Social sciences / Sciences sociales:* 473, 474, 479, 480, 481, 485, 486, 504, 505, 513, 514, 516, 518, 521, 523, 526, 529, 533, 536, 537, 547, 548, 550, 552, 553, 555, 556.
4. *Philology; languages / Philologie; langues:* 512, 521, 522, 525, 527.
5. *Pure science / Sciences pures:* 593, 506, 507, 508, 511, 517, 520, 525, 528, 530, 532, 535, 539, 540, 542, 546, 548, 551, 553, 554, 556, 560.
6. *Applied science and useful arts / Sciences appliquées et arts utiles:* 472, 473, 475, 484, 506, 507, 511, 515, 517, 520, 523, 525, 528, 530, 531, 532, 534, 538, 541, 543, 545, 548, 551, 554, 558, 560.
6.1. *Medicine / Médecine:* 477, 511, 516, 519, 547, 548, 549, 559, 560, 561.
7. *Fine arts and recreation / Beaux-arts et récréation:* 488, 489, 513, 522, 524, 526, 527, 531, 544.
8. *Literature / Belles-lettres et littérature:* 503, 510, 512, 521, 552, 556, 557.
9. *Geography; history; biography, etc. / Géographie; histoire; biographie, etc.:* 476, 503, 506, 510, 513, 536, 544, 546, 547, 548, 550.

(472) DOCUMENTATION ON BUILDING

In pursuance of the recommendations of a Conference on Building Documentation held in Geneva from 6 to 15 October 1949 under the auspices of the United Nations Economic Commission for Europe, an International Council for Building Documentation was established in Paris, and met for the first time on 23 October 1950 under the chairmanship of Mr. Marini, Chairman of the French Committee for Building Documentation and President of the provisional Executive Committee, who was subsequently elected President of the Council.

The aims of this Council, whose headquarters are in Paris (4, avenue Raymond-Poincaré, 16e), are "to develop, throughout the world, documentation and information in the field of building, and to encourage, to facilitate and to co-ordinate the exchange of documentation and information among the various countries as well as among interested international organizations".

Among other activities relating to these aims, the International Council has undertaken to:

"Co-ordinate the activities of the National Committees (or Centres) for Building Documentation and to promote the creation of those not yet set up;

"Establish common basic principles for terminology, classification, and methods of filing and presentation with respect to building documentation."

Twenty-three countries and 11 international organizations were represented at the constituent Assembly of the Council. Today the ICBD has 13 members, each of which has its own National Committee (or Centre) dealing with the subject, since any country seeking admission to the ICBD must have such a body.

As is often the case in the early days of any international organization, the first centres or committees have been established in a small group of advanced countries; these have put into practice a system for the production and exchange of building documentation, principally in the form of abstracts of articles. This system has been in operation since the end of 1950 and now covers all the member countries and Finland. It enables those taking part to pool the results of research carried out by their technicians on possible economies in the use of materials, on the latest methods of construction, and on the productivity of labour.

Many countries which are not in a position to produce documentation, however, are very much in need of it. The housing crisis affects the whole world, and the wholesale destruction caused by wars and the hold-ups in reconstruction programmes can be remedied only by a systematic increase in production, particularly in the building industry.

There is no disputing that one of the best means of facilitating this increase lies in providing these countries with the documentation they lack and in enabling them to profit by the experience of other countries where the same problems have arisen and have sometimes been solved. The Provisional International Committee on Bibliography, convened by the Director-General of Unesco in London in April 1951, had on its agenda the question of means of improving the availability of existing international specialized bibliographies. It adopted a proposal by Mr. Agard Evans, Vice-President of the ICBD, who

represented the Council at this meeting. In this the Committee recommended the Director-General of Unesco to arrange, "in co-operation with the International Council for Building Documentation, for the diffusion in the Near and Middle Eastern countries of building abstracts".

Following the acceptance by the ICBD of the modest sum which Unesco was able to make available, a contract for the carrying out of this recommendation was signed between the two organizations in December 1951.

The scheme is planned as a pilot project in the circulation of building documentation. The region is particularly well chosen and important as, the more rapidly industrialization proceeds in the countries in this area, the more problems there are for local economy. At the cost of many trials and errors, the countries of Europe have slowly and gradually gained experience. The object now is to enable the Middle East to benefit from this experience and the constant research work that lies behind it.

Unesco also has devoted particular attention to developing the resources and organization of library and documentation services in this area, and has given technical assistance for the purpose to five applicant countries. Unesco's Science Co-operation Office in the Middle East, which has been working for some years in Cairo, with a branch in Istanbul, is also devoting considerable effort to documentation problems by publishing annually the *List of scientific papers published in the Middle East*. The experts responsible for the bibliographical projects under Technical Assistance and the Science Co-operation Office provide reliable and efficient operational bases for the experiment undertaken by the ICBD.

The objective aimed at is threefold: to improve distribution, to make certain that the documentation distributed is properly used, and to stimulate the production and circulation of local documentation (i.e. material prepared with the help of documents published in the countries concerned).

The first phase consisted in drawing up, from information collected from the most reliable sources and checked on the spot, a list of organizations and persons likely to find the proposed documentation helpful, and in organizing the distribution of documentation to all recipients, in co-operation with the national centres producing abstracts and bibliographies.

The second phase is to make sure that the documentation received is examined, criticized and used. Continuous contact will be maintained with the organizations and persons receiving the documentation, with a view to obtaining suggestions for adapting it better to the needs of the countries concerned (preparation of Arabic translations, inclusion of abstracts from reviews dealing specifically with these problems in the Middle Eastern countries, etc.) and generally ascertaining readers' opinions. Any suggestions so obtained will be transmitted to the National Centres, so that they may improve the abstracts they produce.

The ICBD will also endeavour to obtain technical documents published locally. The Middle Eastern countries will be encouraged to make full use of their own publications in this field by preparing their own abstracts and bibliographies.

In the final phase, the ICBD will establish close contacts with local technical organizations, so as to obtain the most accurate possible information on: the present position of building documentation in the Middle East; requirements in this field; the best way of remedying the most obvious shortcomings.

The ICBD will keep Unesco informed of the progress of its work by interim reports and will present a final report, describing the results of the experiment, in March 1953. This report will also indicate what departments should be set up and what measures taken if the building situation itself is to be improved. For the ultimate objective in view is to help in solving this technical problem, whose social importance throughout modern society is universally admitted.

NEWS AND INFORMATION

UNESCO AND INTERNATIONAL NEWS

APPEAL TO READERS

Since the *Unesco bulletin for libraries* was first published in April 1947, it has mainly been distributed free to libraries in all Unesco Member States. As, however, the number of copies of the *Bulletin* which can be printed is for reasons of economy strictly limited, we are unable to extend circulation to meet the constantly increasing demand unless some part of the circulation is covered by subscriptions.

Libraries becoming subscribers will afford a direct and practical contribution to an important and unique international library activity. They will enable more libraries to receive this publication free and to become partners in a world-wide system of exchange of information which extends with the expansion of its contacts.

Libraries are urged to get into direct touch with the national distributors of Unesco publications in their own country (see list of addresses on back cover of this issue), and subscribe at the annual rate of $2; 12s.3d.; 600 Fr. frs.; or the equivalent in local currency. At the same time libraries taking out new subscriptions are asked to notify the Unesco Clearing House for Publications, 19 Avenue Kléber, Paris-16e, by postcard that they have done so.

(473) UNIVERSAL POSTAL UNION: THIRTEENTH CONGRESS—1952

The post, which started off by carrying only official communications, has little by little been transformed into a public service at the disposal of every inhabitant of the globe. But it is only for the last 100 years or so that printed matter has enjoyed preferential treatment in the majority of countries. The establishment in 1874 of the Universal Postal Union did much to develop this tendency. From the outset, the Union continued on the international level the work already initiated by postal services on the national level with a view to promoting the dissemination of ideas by the adoption of preferential rates and by the speediest possible delivery of books and newspapers.

As the institution specially responsible for the development of education, science and culture, Unesco has always been conscious of the importance of the post as an essential auxiliary in the propagation of ideas and the extension of international co-operation. One of the most important tasks prescribed in its programme is the promotion of the free flow of ideas by word and image and by the international exchange of publications, works of art, laboratory equipment and documentary material. For this reason the Organization has done its best to support and extend the work of the Universal Postal Union (UPU) by recommending its Member States to implement as widely as possible certain decisions of the Paris Congress of 1947 and by suggesting to them new proposals for the Thirteenth Congress which was held from 13 May to 12 July 1952 in Brussels.

The Fifth Session of the General Conference of Unesco had recommended Member States to take measures to give effect as early as possible to the two following agreements, concluded in 1947 under the auspices of the UPU:

(1) An arrangement allowing for the payment in national currency, through post offices, of subscriptions to foreign newspapers and periodicals;

(2) The provisions of Article 36 of the Universal Postal Convention concerning the reduction of postage rates for printed matter.

A number of Member States responded to this appeal by reducing their rates or by signifying their willingness to extend the system of payment in

national currency, through post offices, to cover foreign newspapers and periodicals. (See *Unesco bulletin for libraries*, vol. V, no. 2 and vol. VI, no. 5/6.)

The favourable reception with which this recommendation met, led Unesco to suggest to Member States that they should submit to the recent Brussels Congress resolutions calculated to achieve these purposes. Some of these resolutions were passed and others, framed with the same purpose, were also favourably received.

Among the new decisions of the Congress, particular mention should be made of:

1. A proposal for a 50 per cent reduction (a) on the rates for all printed matter; (b) whoever the sender.
   (a) In its previous form, the Convention had made a distinction between books, newspapers and periodicals and other classes of printed matter. The former were entitled to a 50 per cent reduction, but the postal administrations which applied this reduction might fix a minimum charge at least equal to the postage applicable "to the same articles in their inland services". Certain countries had interpreted this reservation as meaning that the international rate for books, newspapers and periodicals should not be lower than the rate for "ordinary printed papers". Postage on the latter is generally higher than that applied to newspapers, periodicals and books in the inland services of the various countries, and the result was to place publications sent abroad at a disadvantage in comparison with those circulating within a country. In reality, the intention of the authors of the Convention had been to provide identical treatment for identical articles. By extending the text of the regulation to all printed papers, the resolution adopted by the Brussels Congress ensures that the 50 per cent reduction shall be uniform, and that rates for publications sent abroad shall parallel the favourable rates for publications posted within a country.
   (b) The resolution also states that the reduction shall be granted, no matter who is the sender. In its previous form, the Convention had provided that only publishers or their agents could benefit from it. The new resolution has thus also put an end to another form of discrimination which used to work to the detriment of private individuals.
2. An amendment, proposed by the Czechoslovak delegation, providing for free postal transportation of books for the blind.
3. Finally, an amendment submitted by the Swiss delegation, extending an existing arrangement permitting payment in national currency at local offices for subscriptions to foreign newspapers and magazines, and their dispatch at reduced rates. This service will now be greatly simplified, so that many more countries will be able to participate.

(474) 1952 COPYRIGHT CONFERENCE

The Inter-Governmental Conference organized by Unesco for the adoption of the Universal Copyright Convention took place in Geneva from 18 August to 6 September 1952 at the invitation of the Swiss Government. Unesco published in its *Copyright bulletin*, vol. V, no. 1, 1952, the documents on which the Conference worked. These included the resolution on article XVI of the Draft Convention adopted by the meeting of copyright experts of the American Republics; comments on the preliminary draft of the Convention; the preliminary remarks submitted by the Head of the Unesco Copyright Division to the Fourth Committee of Experts and finally the concluding part of the study of international copyright protection in various countries of the world. In an early number of the *Copyright bulletin* a record will be published of this Conference.

(475) CUMULATIVE INDEX OF TRANSLATIONS OF BOOKS 1937-51

The International Institute for Intellectual Co-operation in 1952 began publishing the international quarterly bibliography, *Index translationum* of which the last issue was dated 1940; Unesco resumed publication of the *Index*, as an annual volume, in 1948.

Each volume of the *Index* contains a statistical table of all its entries. The Unesco Statistical Division prepared the summary tables which will be found on page B93 of this issue of the *Bulletin for libraries* and which show the number of translations reported for 1951 as well as the annual or average annual production in various preceding years. Translations are counted in numbers of titles and classified in the UDC Categories. The table lists the annual production of translations for the year 1951, and the average annual production for 1948-50 and 1937-39 for each country, depending upon the availability of data. The year refers to the volume of the *Index* in which the translation was listed; some translations were listed in the year following the year of publication. Reports from some countries covered several years without indicating the actual year of publication of the individual translation. For further details see the Unesco report on book production 1937-50 (Unesco/ST/R/9 Paris, 15 July 1952, 97 p.).

The Unesco Arts and Letters Division, which is responsible for the *Index*, collects bibliographical data on translations published in all countries. It obtains the data from agencies appointed upon request of Unesco by their governments. Not all countries, however, have answered the appeal, and where this has been the case, Unesco has endeavoured to collect data from national bibliographies and other sources. Such information is, naturally, often incomplete. (See *Bulletin for libraries*, vol. VI, no. 2/3.)

First editions as well as some revised editions and reprints are reported in the *Index*. Some countries exclude translations in national languages intended for use in schools. Some countries report pamphlets for inclusion in the *Index*. The reporting agencies are therefore encouraged to state, in addition to the bibliographical data currently given, the number of pages in the translation, the year of publication, whether it was a first edition, revised edition or reprint, and whether it was intended for use in schools.

The imperfections in the reporting of bibliographical data to Unesco and the lack of uniformly applied standards should be kept in mind in drawing conclusions. The proportion of the total production of translations to the production in the subject categories is instructive; these percentages for the various years can be compared within a country, or between several countries or groups of countries, or even generally, for all reporting countries together.

The possibility of preparing a table classifying books by original language and language into which they were translated, without reference to the publishing country, has been suggested by national organizations. If sufficient demand arises it may be possible to undertake such work in future years.

(For tables see page B93).

(476) SCIENTIFIC AND CULTURAL HISTORY OF MANKIND

The publication of a quarterly *Journal of world history*[1] has been announced by the International Commission for a Scientific and Cultural History of Mankind. The first issue is to come out in the Spring of 1953.

Each number will contain about 200 pages of original contributions on

1. The title is still provisional.

various aspects of the historical development of man and society, and about 100 pages of criticisms, comments and suggestions on the articles contributed, as well as on history in general.

News on the progress of the scientific and cultural history of mankind, entrusted to the International Commission, will also be included.

The full articles will be published in one of the three working languages of the Commission (English, French, or Spanish) and abstracts will be given in the two other working languages as well as in German and in Russian.

The International Commission is an association of prominent scholars working under the auspices of Unesco. Its ultimate objective is to prepare a scientific and cultural history of mankind. For this purpose scholars of all countries and cultures will be invited to contribute articles towards the preparation of each of the six volumes of the history. These original contributions will be published in the *Journal of world history*. Topics that may transcend cultural and chronological boundaries are to appear in the form of symposia, as special supplements to the *Journal*. This publication will thus provide a medium for critical comments on the project of the history and on the materials prepared for its realization.

It will constitute an important addition to historical publications since the work of the International Commission is to be a co-operative endeavour. In publishing the *Journal of world history* the International Commission hopes to create a continuing process of world-wide thinking on historical and contemporary problems.

Further details about this forthcoming publication may be had from the Secretary-General of the International Commission for a Scientific and Cultural History of Mankind, Room 217A, Unesco, 19, Avenue Kléber, Paris-16e, France.

(477) LIST OF WORLD MEDICAL PERIODICALS

In 1949 the Co-ordinating Committee on Medical and Biological Abstracting, convened by Unesco with the co-operation of WHO, decided to prepare a world list of titles of medical and related journals. This list has been prepared and consists of 3,908 titles. Announcements have already appeared that the list has been published. It has in fact been printed, but has not yet been published, pending settlement of a dispute concerning the use of the proposed title *Periodica medica mundi*. It is hoped that it will be issued in the near future.

(478) DEWEY DECIMAL CLASSIFICATION IN SPANISH

On 19 May 1952, the Colon Library of the Pan American Union undertook to translate into Spanish the Dewey Decimal Classification System, in accordance with a contract concluded between the publishers of that work, Forest Press Inc., and the Organization of American States, whereby the latter accepts responsibility for organizing and directing the translation of the system on the basis of the fifteenth revised edition. Miss Norah Albanell MacColl, librarian, has been appointed to do the translation.

The need for works in Spanish like the Dewey Classsification System has made itself felt not only in connexion with the organization of libraries, but also for professional training in bibliographical schools.

(479) UNESCO GIFT COUPONS

The Unesco Gift Coupon Scheme, which permits the purchase of books, periodicals, films, audio-visual equipment and scientific material, has already been

the subject of two articles appearing in the *Bulletin for libraries* in the months of April 1951 (vol. V, no. 4) and April 1952 (vol. VI, no. 4). The United States, France and the United Kingdom were the first to adopt it, and Australian, Canadian, Dutch and German organizations have also decided to take part in its application. Thus there are now seven countries where bodies of donors want to come to the help of schools, institutions, libraries, etc. in war-devastated or under-developed countries. Yet other countries, such as Belgium, Denmark, Japan, New Zealand and Sweden, have shown their interest in the movement, either by holding collections whose proceeds are sent to Unesco for conversion into Gift Coupons, or by planning active participation in the execution of the programme.

The Organization has also collected data about centres which are in need of support and has drawn up assistance plans relating to more than 100 institutions regarded as having priority and distributed over some 40 countries. These plans are submitted to the donor bodies which, once in possession of the necessary information, can pick the institutions they wish to help. As part of these plans, Unesco's Clearing House for Publications has made a special list of the libraries which are most in need of support, in order to procure the books and periodicals they lack. This list mentions libraries in the following countries: Ceylon, Czechoslovakia, Egypt, Germany, Greece, Hungary, India, Indonesia, Iran, the Netherlands, the Philippines, Senegal, Uruguay and Yugoslavia. The schools of the Arab refugee camps in the Middle East have recently been added.

To avoid the issue of special coupons every time a new country joins the Scheme, the Unesco Division of Voluntary International Assistance (VIA) has now unified the various coupons, whose value is at present quoted in dollars, French francs and pounds sterling, into a single "currency". The new coupon is called a "UNUM" Gift Coupon and will be on sale in all countries where there are bodies collecting funds for the execution of the programme's plans at the local equivalent of $5. The term "UNUM" is abbreviation of the words Unesco Unit of Money.

The Gift Coupon programme operates through organized bodies such as associations, libraries, clubs, schools, trade unions, etc. Requests coming from private persons cannot therefore be considered. Further information can be obtained from the following addresses:

United States and Canada. Unesco Gift Coupon Office, United Nations, New York.

United Kingdom. United Kingdom National Commission for Unesco, Ministry of Education, 11 Bryanston Square, London, W.1.

France. Bureau des Bons d'Entr'aide de l'Unesco, 19, Avenue Kléber, Paris-16e.

Australia. United Nations Association, 29 Bligh Street, Sydney.

Netherlands. The Unesco Centrum, Voldelstraat 20, Amsterdam.

German Federal Republic. National Commission for Unesco, Hansaring 24, Cologne.

(480) GIFT COUPONS FOR UN DAY

Libraries the world over are being called upon to take a lead in community observance of UN Day, 24 October. On this anniversary of the founding of the United Nations, public libraries can serve as centres for information and civic activities.

In the United States, the American Library Association is preparing to supply public libraries with display materials and literature on Unesco's Gift Coupon programme. UN Day usually stimulates people to ask, "What can I do to help the work of the United Nations?" By answering this question in terms of Unesco Gift Coupon projects, public libraries will themselves be

rendering direct service to the world-wide programme of Unesco, which is a Specialized Agency of the United Nations.

Readers of the *Bulletin for libraries* in the United States and Canada may write for Gift Coupon information to: Unesco Gift Coupon Office, United Nations, New York. Readers in other countries should apply to their National Commissions for Unesco.

(481) UNESCO BOOK-BOXES AND FREE STUDY KITS

UNESCO WORK CAMP LIBRARIES

In 1948, 1949 and 1952 Unesco prepared 50 libraries to be used in international voluntary work camps, each containing 200-400 publications, largely in English, French and German, concerning the United Nations and its Specialized Agencies, international problems, social psychology, philosophy and the cultural history of mankind. Fiction and poetry are also included.

At present these libraries are on loan to 45 groups which organize international voluntary work camps. Each spring an enquiry is made to discover whether the libraries will be used in the summer programme. Libraries not in circulation are then loaned to organizations requesting them from the Unesco Youth Section. Until the present, Unesco has usually paid the transportation costs. During the winter, the books are generally kept at a youth centre.

UNESCO WORK CAMP BOOK-KITS

In 1951 and 1952 Unesco prepared 75 book-kits to be used in international voluntary work camps, each containing 100-150 publications, in English, French, German and Spanish. The books, pamphlets and posters are gifts from the United Nations and its Specialized Agencies, various Embassies and National Commissions for Unesco, and interested private individuals and organizations.

Organizations sponsoring camps may send their request to the Youth Section of Unesco. Their requests are noted, and at a meeting of the Co-ordination Committee for International Voluntary Work Camps distribution of the kits is recommended. These book-kits have usually become the property of the receiving organization, which uses them in various activities during the winter months.

STUDY-KITS FOR INTERNATIONAL RELATIONS CLUBS

Study-kits are now being prepared for international relations clubs. A list of available publications (mostly publications of the United Nations and its Specialized Agencies) will shortly be sent to National Commissions for Unesco, international youth organizations and associations sponsoring international relations clubs.

Organizations sponsoring clubs, or individual clubs, should address their requests for this material to the Unesco Youth Section, giving a brief description of the club's activities.

DOCUMENTATION FOR INTERNATIONAL YOUTH ORGANIZATIONS

There are available limited quantities of publications for international seminars and study weeks dealing with questions relating to the Unesco programme, i.e. Human Rights, tensions affecting international understanding, race. Requests should be addressed to the Youth Section at Unesco.

GENERAL NEWS

(482) STANDING CONFERENCE OF NATIONAL AND UNIVERSITY LIBRARIES

An addition has recently been made to the organization of the British library world by the foundation of the Standing Conference of National and University Libraries. Although Aslib and the University and Research Section of the Library Association have for many years provided general meeting places for the staffs of learned, scientific and technical libraries, these libraries vary very greatly in size and interests, and there has been no place where the responsible officers of the really large libraries could meet for the discussion of the problems peculiar to their work. It is in order to provide such a meeting place that the new body has been founded. Its membership is institutional and is limited to some 30 of the largest libraries in the British Isles—the national libraries, the university libraries, and the larger university college libraries—each being represented by its principal officer, with additional representation for the British Museum, the Bodleian and the Cambridge University Library.

In the United States of America, the Association of Research Libraries, which is constituted on somewhat similar lines, has found that there is much useful work for it to do without competing with other library associations and societies, and it will no doubt be the same in Great Britain. SCONUL proposes to work in close co-operation with other bodies in its field whenever there is one which is appropriate to the task in hand, and its activities, like those of its American opposite number, may well be of value to many libraries beside those included in its membership. The Honorary Secretary of SCONUL is Mr. George Woledge, librarian of the British Library of Political and Economic Science, Houghton Street, London, W.C.2, which is the address for correspondence.

(483) SAAR LIBRARY ASSOCIATION

In April 1952, a library association was established in the Saar: its headquarters are at Saarbrücken.

The objects of the association are to defend the professional interests of its members, to ensure the exchange of information and experience, the development of professional training and the promotion of cultural activities; and to co-operate with similar professional associations.

All full-time qualified librarians of the popular libraries in the Saar region are members of the association.

The association attaches great importance to the improvement of the professional knowledge of its members and would like to establish contacts with library associations in other countries to exchange professional information.

The association's address is: Verein der Volksbibliothekare, H. Klevinghaus, Sulzbach-Saar, Salmstrasse 22.

(484) CANADIAN GIFT OF BOOKS AND SCIENTIFIC APPARATUS

As the result of a collection recently made at the University of Toronto, gifts of books and miscellaneous scientific apparatus have been presented to three universities in India and Pakistan. Among other things, the University of Delhi received a multigraph apparatus for printing textbooks, and the University of Sindh, 43 microscopes, precision instruments and textbooks.

(485) JAPANESE INTERNATIONAL PUBLICATIONS EXCHANGE CENTRE

The Division of International Affairs at the National Diet Library of Japan is now performing the function of an international publication exchange centre. The work of the Division covers the free distribution in Japan of publications to other national exchange centres.

In 1951, 14,046 packages and 226 cases of publications were received from national exchange centres in Australia, Belgium, Denmark, France, the Netherlands, Norway, Portugal, Spain, Switzerland and the U.S.A. and from individual institutions in other countries. During the same period, 62,236 volumes of Japanese material were sent by the exchange centre to more than 32 countries.

The activities of the centre have developed year by year. Since the summer of 1950, exchanges with Germany and India have advanced steadily. With Germany, exchanges of scientific magazines, books on law and economics, Japanology, and several daily newspapers, have been established on behalf of 30 Japanese scientific institutes and university libraries.

Exchanges of publications and reprints in the field of the natural sciences have been carried out, in co-operation with the Unesco Office for South Asia in Delhi, between the Indian National Institute of Science, the Calcutta Mathematical Society, the Indian Association for the Advancement of Science, and about 20 Japanese scientific institutions. An exchange of bibliographical material has begun with the Bibliographical Institute of Yugoslavia as well as with Australia, Czechoslovakia, the Netherlands, New Zealand and Sweden.

The Division sends microfilms and photocopies to scientific organizations abroad wishing to receive copies of Japanese scientific articles.

The National Diet Library co-operates with the Unesco Clearing House for Publications for the exchange of duplicates among libraries in the world. It has distributed 507 copies of exchange and free distribution lists among various universities and public libraries in Japan, and has prepared lists of duplicates offered by Japanese libraries for exchange through the Unesco Clearing House.

(486) NETHERLANDS PUBLICATION EXCHANGES IN 1951

The activities of the Netherlands Exchange Bureau in 1950 were described in the *Bulletin* (vol. VI, no. 1). In 1951, 156 crates and 16 parcels containing 15,496 separate packages of books were sent to 25 different countries, and 186 crates and 43 parcels containing 12,287 separate packages were received from 14 countries.

(487) CONFERENCE ON LIBRARY SCIENCE IN BRAZIL

Brazilian librarians held their first conference on library science in Recife during the third week in July 1952 on the theme of library problems in Brazil. This Conference was planned as a result of the Conference on the Development of Public Library Services in Latin America held at São Paulo in October 1951, which was sponsored by Unesco and the Organization of American States.

(488) SYMPOSIUM ON SCIENTIFIC AND TECHNICAL DOCUMENTATION

During April 1952 a two-day Symposium on Scientific and Technical Documentation was held in Jerusalem under the auspices of the Research Council of

Israel, and was attended by 250 participants, mainly librarians and archivists.

At this symposium, papers were read on: documentation, a report on the FID Congress in Rome, September 1951; standardization in documentation; documentation in public administration; the national library and documentation; inter-library microfilm catalogues; the microfilm as an aid to archives; photo-duplication techniques; and inter-library co-operation.

Among other matters discussed were the increased import of scientific literature, vocational training for librarianship, adoption of a standard Hebrew nomenclature, and the preparation of a union list of scientific and technical periodicals. Copies of the inter-library microfilm catalogue, comprising 100,000 cards, were distributed.

Several microfilm projects on hand or being planned were discussed and it was agreed that locally produced microfilm readers should be available in Israel. The Research Council is sponsoring the manufacture of two different kinds, one being a large desk model, the other a pocket model. Both are suitable for 35 and 16 mm. films. At a later date these readers may be exported.

MICROFILMS AND MICROCARDS

(489) REPOSITORIES FOR WORKS OF ART OF UNIVERSAL INTEREST

The Fourth Session of the General Conference of Unesco, in 1949, adopted a resolution instructing the Director-General to encourage Member States to produce a series of microfilms of works of art offering a universal cultural interest, and of which no satisfactory reproductions exist.

ICOM (the International Council of Museums) was asked to study the problems raised by the storage of these microfilms, and Unesco, on the basis of a report presented by a special sub-committee appointed by ICOM, asked a number of countries to set about preparing repositories specially designed to afford them shelter. The United States, Australia and the United Kingdom replied affirmatively to this request and detailed researches into the preparation of fireproof and bomb-proof repositories are being carried out at the moment.

PUBLICATIONS

Under this heading the *Bulletin* mentions new and important bibliographical publications, reference works, recent scientific books and periodicals of special interest. Libraries and publishers are asked to co-operate by supplying us with full details of such publications.

Readers in the countries participating in the Unesco Book Coupon Scheme are reminded that publications reviewed in this section, if obtainable in Belgium, Burma, Ceylon, Czechoslovakia, Egypt, France, the German Bundesrepublik, Hungary, India, Indonesia, Iran, Israel, the Netherlands, Pakistan, Switzerland, Thailand, the Union of South Africa, the United States of America, or Yugoslavia, can be bought with Unesco book coupons.

BIBLIOGRAPHY

(490) BRAZIL. BIBLIOTECA NACIONAL. *Boletim bibliográfico*, 1º e 2º trimestres de 1951. Rio de Janeiro, Biblioteca Nacional, Divisão de obras raras e publicações, 1952. 136 p.

A law passed in 1908 provided for the publication by the National Library

of Rio de Janeiro of a national bibliography, giving the author, publisher and price of all works received in the library by legal deposit.

The National library has just published the first volume of this bibliography. It is in two parts; one covering January to March, and the other April to June 1951. Entries are arranged according to the Dewey Decimal Classification, and the lay-out is the same as that used for catalogue cards. At the end of each part there is an index of names of authors and a subject index.

(491) LA DOCUMENTATION FRANÇAISE. *Bibliographie sélective des publications officielles francaises*, 1re année, no. 1, 15 janvier 1952. Paris, La documentation française, 16, rue Lord-Byron, Paris-8e. Subscriptions: France: 1,000 Fr. frs. a year; abroad: 1,500 Fr. frs. a year.

This bi-monthly bibliography, the first number of which appeared in January 1952, supplements the *Supplément F* of the *Bibliographie de la France* which lists all official non-periodical publications received in the National Library by legal deposit. The new bibliography is a select list of texts and documents appearing in official periodicals as well as those published separately.

It is in two parts: (1) *Documents administratifs* lists all important documents of a purely administrative character which appeared in the fortnight preceding publication. Classification is the same as that used in the *Supplément F*; (2) *Bulletin des sommaires* lists the principal non-administrative articles and documents summarized in official periodicals published during the preceding forthnight.

The bibliography is published under the auspices of the Commission interministérielle de documentation et diffusion and the Co-ordinating Committee on Documentation in the Social Sciences.

(492) HORECKY (PAUL L.), ed. *Preliminary checklist of Russian, Ukrainian and Belorussian newspapers published since 1 January 1917, within the present boundaries of the U.S.S.R. and preserved in United States libraries.* Washington D.C., Library of Congress, Slavic Division, 1952. 97 p.

The Library of Gongress has released this preliminary list, compiled primarily to help in the selection of items for microfilming. The entries represent mainly newspapers available in the Library of Congress. The list is arranged alphabetically by places of publication and contains the following information: place of publication, title of newspaper, issuing body (government, party, etc.), frequency and date of establishment, and changes in the location, title, frequency or issuing body.

(493) CUMMINGS (A. E.) and VINCE (S.). *German books on chemical and cognate subjects published 1939-1950.* Second revised and extended edition. London, Lange, Maxwell and Springer Ltd., 41-45 Neal street, 1951. 102 p.

The second edition of this useful list covers the following subjects: general theoretical and physical chemistry; inorganic, organic and colloid chemistry, chemical analysis, geochemistry, crystallography, food, physiology, pharmacognosy, pharmaceutical chemistry, chemical technology, metallography, mathematics for chemists, and physics. It contains many new titles and also titles known to be in active preparation. It is arranged by subject, with an author index.

Most of the books in the list can be obtained from the publishers at the above address. The list is supplied on request and free of charge to scientific and industrial libraries and individuals.

(494) *A Szovjetunió és a Népi Demokraciak Könyvtárügye; A Szovjetunió Könyvtárügyének Kronológiája* (Libraries of the Soviet Union and the People's

Democracies; chronology of the libraries of the Soviet Union), no. 13-14, published by the National Libraries Centre and compiled by Béla Köhalmi, Budapest 1951, 50 p.

This work gives in chronological order a certain number of facts concerning Russian libraries from 1037 to 1950; dates of establishment, founders, reorganization and various characteristics.

(495) BULGARIA. BALGARSKI BIBLIOGRAFSKI INSTITUT ELIN PELIN. *Svoden katalog na cužde strannite periodični izdanija po-golemite balgarski biblioteki*, 1 Januari 1948-1 Januari 1951. Sofia, The Institute, 1952. 290 p.

A collective catalogue of foreign periodicals in the principal Bulgarian libraries. The periodicals are divided into two classes, those published in Cyrillic and those in Latin characters. There is a subject index.

LIBRARIANSHIP

(496) UNESCO. *Development of public libraries in Latin America.* Paris, Unesco, 1952. 208 p. $1, 6s., 300 Fr. frs. Obtainable from Unesco national distributors (see back cover of the *Bulletin*).

This volume, the fifth in the Unesco series of "*Public library manuals*", contains a selection of the working papers and recommendations of the Unesco-Organization of American States Conference on the Development of Public Library Services in Latin America, held in São Paulo, Brazil, in October 1951, and attended by 119 representatives from 17 countries.

The expert contributors analyse the main problems to be solved in making public library services to popular education fully effective in this region. There are chapters on the legal basis for public library development, provision of suitable reading material for adults with little formal education, services for workers, work with children and young people, and the professional training of librarians for community service.

While the book refers to one region, it has a far wider relevance, since the problems it explores are common to many other parts of the world. Librarians, government officials and educators in all countries where public libraries are not yet fully developed will find it a stimulating and useful guide.

English language edition now available; also to be published in French and Spanish.

(497) *The public library, a living force for popular education.*

This Unesco public library manifesto is now available in Arabic. Printed as a leaflet and poster, it is helpful to librarians in developing the general public's appreciation and understanding of public library service. Copies of the leaflet and poster may be obtained free from governmental educational authorities in Arabic-speaking countries and from Unesco, 19, Avenue Kléber, Paris-16e. Earlier editions of the publication were in English, French, Spanish and Italian.

(498) RANGANATHAN (S. R.). *Social bibliography or physical bibliography for librarians*, Delhi, University of Delhi, 1952. 348 p. (no. 4 in the "*Library science*" series of the University of Delhi)

Social bibliography is defined as physical bibliography studied from the angle of the library as a social institution with a broad task of providing books for self-education and self-entertainment. This book deals with the role which librarians and social bibliography play in developing the educational and cultural life of India.

The author examines five laws of library science and shows what each contributes to social bibliography, and there are chapters on paper making,

printing and binding. Throughout the book, Dr. Ranganathan insists on the advantages India can gain in applying rapidly new and improved technological processes to meet the enormous needs of the country for cheap and economical production of all types of printed materials.

(499) *Library trends*. Vol. I, no. 1, July 1952. Urbana, University of Illinois Library School. Subscription rates: $5 a year, single copy, $2.

A new journal of librarianship issued quarterly by the University of Illinois Library School which presents in each issue a synthesis and evaluation of a single topic, edited by a guest issue editor. All articles are written by invitation, each issue contains about 100 printed pages; there are no news notes, book reviews, or other regular departments.

The topic of the first issue is: "Current trends in college and university library developments" edited by Robert B. Browns, Director of the Library and Library School, University of Illinois.

(500) *Occasional papers of the Canadian library association.*

The Canadian Library Association will publish as *Occasional papers* a series of articles by experts on different topics of librarianship. Issues will be numbered in series and will be priced separately. Orders may be placed with the Canadian Library Association, Room 49, 46 Elgin Street, Ottawa, Canada, for single papers or for the series.

(501) FRANK (OTTO). *Ordnung in Karteien und Verzeichnissen*, Handbuch der Klassifikation, H.6. Berlin, W.15/Köln, Beuth-Vertrieb, GMBH, 1952. 3.50 DM. 72 p.

This concise and practical little book is designed to ease the work of all those called on to organize card indexes and catalogues. After an introduction, the author passes to the question of alphabets and makes a thorough study of the transliteration of Cyrillic and other characters. The subsequent chapters contain a large number of practical examples relating to library catalogues, handlists of periodicals and subject indices. The purely material aspect of the question—cards, filing cabinets and mechanical methods of reproduction—is dealt with in the last chapter.

(502) INTERNATIONAL FEDERATION OF LIBRARY ASSOCIATIONS. *Actes du comité international des bibliothèques*, 17e Session, Rome, 12-14 Septembre 1951. La Haye, Martinus Nijhoff, 9 Lange Voorhout, 1952. 182 p.

This volume contains the reports presented at the 1951 meeting in Rome of the International Library Committee of the International Federation of Library Associations. The resolutions voted at the meeting are given in full and there are reports of activities during 1950 from national library associations in 16 countries.

(503) *Annalen der deutschen Literatur*, prepared under the editorial direction of Prof. Heinz Otto Burger of the University of Erlangen and with contributions from 15 members of the Faculty of West German and Swiss universities, Stuttgart, 1952. 900 p.

Deals with German literary history from the earliest times to the present day, and with the historical development of the German language. German literature is considered in its relation to the contemporary writing of other countries. There is a 27-page index. Two shorter supplementary volumes containing chronological tables and bibliography will appear later this year.

UNITED NATIONS

(504) *Revue des Nations Unies.* 1re année, no. 1, juin 1952. Paris, Centre de l'information des Nations Unies, 36, rue La Pérouse. Yearly subscriptions: $4.50, 22s.6d., 1,200 Fr. frs., 18 Sw. frs.

This monthly publication in the French language is intended as a continuous review and analysis of the work of the various sections of the United Nations and its Specialized Agencies. It replaces the *Bulletin des Nations Unies* which began publication in French in 1946.

All the questions discussed in the meetings of the United Nations are reported on in full or in brief. Summaries are given of the various reports presented to the United Nations, of the cases heard by the International Court of Justice, and of the recommendations prepared by working groups and experts.

Each issue contains about 100 to 150 pages. Subscriptions can be placed in national currencies in all countries where there are sales agencies for UN publications.

(505) UNESCO. *Press, film, radio,* films and filmstrips about the work of the United Nations and its Specialized Agencies. Clearing House, series no. 1, May 1952. Paris, Unesco, Department of Mass Communications, 19, avenue Kléber. 31 p. Some copies are available on request.

This description list of 69 films and 32 filmstrips aims to aid all those desiring to secure films on the United Nations and its Specialized Agencies. The list is preceded by a section on the distribution of films, giving general information and drawing attention to the agreements sponsored by Unesco for the removal of custom duties on audio-visual materials, and to the Unesco film-coupon scheme. Appendixes 1, 2 and 3 list names and addresses of 114 distribution agencies in 59 countries and the 20 information centres of the United Nations.

SCIENCES

(506) SARTON (GEORGE). *A Guide to the history of science.* Waltham, Mass., Chronica Botanica Company; Paris-6e, Librarie P. Raymann, 17, rue de Tournon, 1952. $7.50. 316 p.

This guide is not concerned with biology alone, but with all branches of the natural and exact sciences. Divided into two parts which though very different are complementary, it may attract two kinds of readers, scientists and scholars, and historians of science. The first and shorter part, which consists of three lectures delivered at various European universities explains the purpose and meaning of the history of science; the second, much longer part, is a bibliographical summary prepared for the guidance of scholars interested in those studies. It is divided into four parts, each of them including six to eight chapters, and relating to history, science, history of science and organization of the study and teaching of the history of science. An index of proper names completes the Guide.

(507) UNESCO. *Boletín del Centro de cooperación científica,* No 1, Abril-Mayo 1952. Montevideo, Centro de cooperación científica de la Unesco para América Latina, Bulevar Artigas 1320, Casilla de Correos 859.

The principal aim of this *Bulletin,* which is to appear every two months, is to keep scientists in Latin America informed about the activities of the Montevideo Science Co-operation Office and Unesco's Department of Natural Sciences. Two regular features in the *Bulletin* will be news about the dates and programmes of scientific congresses arranged all over the world and about the activity of learned societies and scientists in Latin America. A new series of

articles, which started in the second number, will deal with various aspects of scientific research in Latin America which are of interest to all scientists and research workers in this part of the world. The Science Co-operation Office takes great pains over the choice of the articles and is doing its utmost to see that they are clearly and attractively presented.

(508) EUCKEN (A.). *Landolt-Börnstein Zahlenwerte und Funktionen aus Physik, Chemie, Astronomie, Geophysik, Technik.* Sechste Auflage der "*Physikalisch-Chemischen Tabellen*". Gesamtübersicht. Published by Springer-Verlag, Berlin, Göttingen and Heidelberg. Obtainable through Lange, Maxwell and Springer Ltd., 41 Neal Street, London, W.C.2.

A volume full of information on critical bibliographies of the literature of the type which is essential to the published documentation of science, and which German scientists are expert in organizing. The first edition of *Landolt-Börnstein*, published in 1883, contained 249 pages, the fifth edition, which came out between 1923 and 1936, had grown to 7,460 pages and the first four volumes of the sixth edition, issued since 1950, contain 3,001 pages.

RECENT UNESCO PUBLICATIONS

INDEX BIBLIOGRAPHICUS

Compiled by THEODORE BESTERMAN

(Bilingual)

A directory of current periodical abstracts and bibliographies, compiled along the lines laid down by the International Conference on Science Abstracting which met under the auspices of Unesco in June 1949. Indexed by subject and title.

PUBLICATIONS WANTED
PUBLICATIONS DEMANDÉES

The most urgent requests received by the Unesco Clearing House for Publications are listed below. Libraries able to offer any of the works needed are asked to communicate directly with the library concerned.

In addition, libraries in countries in which the Unesco Gift Coupon Scheme is now operating are urged to consider using the scheme to help meet these needs.

Nous publions ci-dessous la liste des demandes les plus urgentes reçues par le Centre de l'Unesco pour l'échange des publications. Les bibliothèques qui peuvent offrir certains des ouvrages énumérés sont instamment priées de se mettre directement en rapport avec l'institution qui en a besoin.

D'autre part, les bibliothèques des pays qui appliquent le système des bons d'entraide Unesco sont priées d'examiner la possibilité d'utiliser ces bons pour contribuer à satisfaire ces demandes.

AUSTRIA / AUTRICHE

(509) GEMEINDE WIEN, MAG. ABT. 11, JUGENDAMT, REFERAT ERZIEHUNGSBERATUNG, Schottenring 22, Wien,

EXCHANGE
ÉCHANGE

Unless specifically requested to send enquiries to Unesco's Clearing House for Publications, readers should address their applications for material listed in this chapter (accompanied by the titles of books and periodicals they have available in exchange) to libraries and institutions by which it is offered, mentioning the volume, number and page of Unesco bulletin for libraries *in which any offer appears.*

Les demandes relatives aux publications énumérées dans ce chapitre (avec les titres des livres et des périodiques offerts à titre d'échange) doivent être envoyées aux adresses indiquées et non au Centre de l'Unesco pour l'échange des publications, sauf mention spéciale. Les lecteurs sont invités à préciser dans chaque cas le volume, le numéro et la page du Bulletin de l'Unesco à l'intention des bibliothèques *où figure l'offre qui les intéresse.*

(521) UNESCO

The following list of publications offered for exchange by the country mentioned is at present being circulated by Unesco's Clearing House for Publications.
